Ariful Islam

Associate Lead – Software Development | Azure · AWS · On-Premises | Kubernetes (AKS) | .NET · React

Dhaka, Bangladesh | +880 1675-908553 | arifulcuet52@gmail.com | LinkedIn | Personal Portfolio

Cloud engineer and Associate Lead with 9+ years building cloud-native systems in .NET, React and Angular. Designs, deploys and runs microservices on Azure (private AKS, Container Apps), AWS (ECS Fargate, RDS) and customer on-premises data centres, using infrastructure as code (Bicep, Terraform), GitHub Actions CI/CD and private networking. Specialist in SCIM and Entra ID identity integration, leading teams that deliver secure, scalable platforms across finance, education and transportation.

EMPLOYMENT

Associate Lead – Software Development
Kloudynet Technologies, Kuala Lumpur **Aug 2025 to Current**

- Lead development and deployment of a multi-tenant SCIM identity platform (.NET, React, SQL Server microservices), delivered to Azure, AWS and customer on-premises data centres from one set of container images.
- **Azure:** Bicep and GitHub Actions (OIDC) pipelines deploying to Container Apps and a private-network AKS cluster with Helm; VNets, private endpoints and private DNS, Key Vault and App Configuration, with an isolated environment per client.
- **AWS:** Terraform-provisioned VPC with public and private subnets, NAT gateway, route tables, security groups and VPC endpoints; ECS Fargate behind an Application Load Balancer and WAF; RDS for SQL Server, Secrets Manager, KMS, and CloudWatch alarms with SNS.
- **On-premises / private cloud:** Docker Compose on customer VMs behind an NGINX reverse proxy (TLS, WebSockets, subnet allow-lists), an outbound-only self-hosted GitHub runner, the customer's SQL Server, and secrets pulled from Azure Key Vault at deploy time.
- Enforced least-privilege database access on all three platforms with re-runnable PowerShell, Bash and Python scripts; monitor production with Azure Monitor and Application Insights.
- Mentor engineers, run code reviews (clean architecture, SOLID), and write client onboarding runbooks and customer setup guides.

Senior Full Stack Engineer
Kloudynet Technologies, Kuala Lumpur **June 2022 to Aug 2025**

- Built scalable .NET microservices with event-driven messaging using MassTransit and RabbitMQ.
- Integrated Microsoft SCIM and Entra ID for automated identity management across enterprise systems.
- Designed Azure solutions (App Services, Functions, Cosmos DB, SQL Server, Logic Apps) for performance and cost efficiency, and built a Microsoft Teams app.

Senior Frontend Developer (Part-time)
FairPattern.com, Dhaka **Jan 2022 to June 2022**

- Built bus and launch ticket booking, mobile recharge, and loan management systems for major clients.

Full Stack Engineer (Part-time)
PEN Worldwide, Essen, Germany **May 2021 to Dec 2021**

- Built an online exam system with React, Next.js and .NET 6 on SQL Server, deployed via GitHub CI/CD to Ubuntu and Nginx.

Software Developer (Remote)
STS Capital, Vilnius, Lithuania **Feb 2020 to June 2022**

- Built reusable ERP components and migrated legacy AngularJS code to modern Angular.

Earlier roles: Software Engineer, Brain Station 23, Dhaka (Oct 2018 – Jan 2020) · Software Engineer, Projukti Next, Dhaka (May 2017 – Sep 2018) · Technical Consultant, Sheba.xyz (Apr – Jul 2020). Angular and AngularJS modules for insurance, ERP, admission and accounting systems; biometric device integration.

SKILLS

Cloud (Azure): AKS (private clusters), Container Apps, App Services, Functions, Logic Apps, Cosmos DB, Entra ID, Key Vault, App Configuration, Azure Monitor

Cloud (AWS): ECS Fargate, RDS, VPC, ALB, WAF, Secrets Manager, KMS, IAM, EFS, CloudWatch

Networking: VNet/VPC design, subnets and routing, NAT, private endpoints and private DNS, security groups, load balancers, NGINX reverse proxy, TLS, firewall rules

DevOps & IaC: Terraform, Bicep, Kubernetes, Docker / Compose, Helm, GitHub Actions (OIDC, self-hosted runners), Azure DevOps, n8n

Backend: .NET Core, NestJS, Microservices, Entity Framework, MassTransit, RabbitMQ, Redis, Hangfire

Frontend: React, Angular, TypeScript, NgRx, TailwindCSS, Material-UI

Identity & Data: SCIM, OAuth2, OpenID Connect · SQL Server, Cosmos DB, MongoDB, MySQL

EDUCATION

BSc in Computer Science & Engineering — Chittagong University of Engineering and Technology **2012 to 2017**

Certifications: Microsoft Entra ID for Developers · ASP.NET Core Advanced Security · Angular (Intermediate) · Docker Compose · GitHub
